FOLLOW THE RESULTS

Public quick guide | iPhone, iPad or computer

No private code or account is needed to view public results.

1. Open the results

Open the main website:
lustrous-kangaroo-a0071e.netlify.app
Tap **Menu → Live Event Day board**. From Competition scoring, use **Public results**.

2. Choose the competition

Under **Results from the day**, choose an age group: **U12, U15, U18, Open** or **Over 25**. Then choose its **Individuals, Pairs** or **Teams** division. Tap **All** to show every available division button.

3. Read the table

Names run down the left; races run across the top. The numbers are **points**.
Session total adds this session. **Grand total** adds all qualifying sessions. A final shows its own **Final total** and starts from zero.
EL = eliminated; **DNS** = did not start. Both score zero. A dash means no published points yet. Only published results are shown.

4. Move around

Use **Session 1, Session 2, Standings, A Final** or **B Final** links when available. On a phone or iPad, swipe the table sideways to see more races; names and the left total stay visible. Turning the device sideways gives more room.

5. Follow the day

The organiser can display the **current race**, a planned **Event running order**, and venue details with **Get directions**.
Results check for updates automatically. Tap **Refresh results** if needed. If results are missing, check your division and internet connection; the organiser must publish and save them.

6. Return home or see earlier events

Use **Home & Menu** or the yellow **Home** button.
For older competitions: **Menu → Archived Previous Results**.
When viewing this PDF, use your browser **Back** button or return to the website tab. If downloaded, reopen the website.

Spectators cannot change scores. Officials confirm placings and tie breaks. If a race is not showing, ask the organiser to check publishing/saving. You do not need their private code.
